

Rule 1 – Policy No. 370
Reduction/Addition of Extracurricular Program Offerings Guidelines

I. Reduction/addition of Extracurricular Program Offerings

Reduction in Offerings:

In assessing the need to reduce or cut co-curricular programs the following “priority criteria” will be used to formulate the recommendations(s)

1. The total cost of the program
2. The total number of participants in the program
3. The cost per participant within the program
4. The socialization/spectator value of the co-curricular program to students
5. The combination of a program offering both a girls and boys option (equity)

Other considerations may include:

1. The number of spectators who pay to view the program (revenue)
2. Increasing fees to offset the cost of dropping any/all programs
3. The program is offered by a majority of other conference schools
4. The Board of Education retains the right to consider the “academic” value of a program in making final budget cut decisions.

New Offerings

In assessing the need to add a new co-curricular activity, including the resumption of an inactive activity, the following criteria will be used to evaluate the request:

1. Sufficient demonstrated interest by the student body
2. Description of the group’s proposed activities, including total district budget implications
3. Availability of funds within budget guidelines as established by Board of Education
4. Availability of necessary facilities within which to conduct the activity
5. Availability of a qualified advisor/coach approved by the administration
6. Final approval of the Board of Education

II. Range System Guidelines for co-Curricular Activities

The following range system guidelines are to be utilized by the Board of Education in helping to determine staffing and co-curricular offerings within the School District of Lodi. Certified participant numbers and pre-season sign-ups in each activity will also be used as criteria by the Board of Education in determining either the elimination of a co-curricular activity/program or the addition of a co-curricular activity/program. Information will be supplied to the Board of Education at the conclusion of each activity/season and prior to the start of each season regarding participant numbers.
