Visitors interested in our educational programs are welcome in all Lodi schools.

All visitors must report to the principal's office when they arrive in the building. Visitors wishing to meet with instructional staff should make arrangements in advance of their visit whenever possible. These visits may be scheduled during a staff member's preparation time or at any other mutually agreed upon time. Arrangements for classroom visitations should be made in advance with the building principal or his/her designee.

To minimize disruption in the educational process, visitation by children to classrooms will be closely monitored. All visits must be approved by the principal in consultation with the classroom teacher and the parent/guardian. Visits by children during the school day will generally be limited to those individuals participating in a school sponsored educational program.

The requirement to report to the principal's office is waived for school sponsored activities open to the public, e.g. school music programs.
