

# Movement & Strength Training

for Healthy Aging Individuals

Staying active and maintaining our muscle strength as we age are key components to healthy aging. Many times as we age, we find movement more difficult. The tendency is to move less, which results in loss of muscle size, muscle strength, and increased difficulty completing our activities of daily living. Let's work together to get moving more and incorporate strength training to keep our bodies strong and feel our best! If needed, modifications will be provided to accommodate all levels of participants.
